

Website https://www.covera-agents.com/	Stage / batch Fall 2026	Sector Fintech -> Insurance	Team 2
--	----------------------------	--------------------------------	-----------

INVESTMENT THESIS
Covera aims to replace frequent and costly administrative tasks for insurance brokers with AI agents, allowing brokers to focus on client advising and selling [1][2].

TEAM	PRODUCT
Reported team size is 2, and the company is marked as hiring by YC [1].	The product is an AI-driven system that automates several administrative tasks for insurance brokers, integrating with existing tools and systems [1][2].
MARKET	WHY NOW
The market is the insurance brokerage sector, with a focus on SMBs that could benefit from automation of repetitive tasks [1][2].	The increasing complexity and volume of insurance-related administrative tasks create a ripe opportunity for automation solutions [1][2].

DIMENSION SCORE BREAKDOWN				
Workflow Pain 8/10 / 25% wt	Speed To Value 7/10 / 20% wt	Compounding Advantage 6/10 / 20% wt	Team Execution 4/10 / 15% wt	Market Distribution 7/10 / 20% wt
KEY RISKS		WHAT CHANGES OUR MIND		
- The small team size may limit the company's ability to scale and execute quickly [1].		- Evidence of significant customer traction and positive feedback. - Demonstration of a larger, more experienced team.
