INVESTMENT THESIS

Decawork aims to solve the problem of AI agent sprawl within companies by providing a centralized control plane for IT teams to deploy, govern, and maintain these agents. The company's defensible advantage lies in its ability to standardize agent deployment, provide scoped access and audit trails, and integrate with various tools and systems [1].

TEAM	PRODUCT
The team size is reported to be 2, but specific execution evidence or credentials are not disclosed [1].	Decawork's product is an agent control plane that allows IT teams to manage AI agents built in any tool. It provides features like agent inventory, scoped access, approval gates, and audit trails. [1]
MARKET	WHY NOW
The market for internal AI agent management is not explicitly defined in the evidence. The ideal customer profile (ICP) and credible market size are not disclosed [1].	The timing is driven by the increasing ease of building internal AI tools and agents, leading to a need for better governance and control over these tools within companies [1].

DIMENSION SCORE BREAKDOWN

Workflow Pain 8/10 / 25% wt	Speed To Value 6/10 / 20% wt	Compounding Advantage 7/10 / 20% wt	Team Execution 4/10 / 15% wt	Market Distribution 5/10 / 20% wt
--------------------------------	---------------------------------	--	---------------------------------	--------------------------------------

KEY RISKS

- The small team size may pose execution risks, especially if the company aims to scale rapidly [1].

WHAT CHANGES OUR MIND

- Evidence of significant customer traction or partnerships with large enterprises.
- Detailed case studies or testimonials from existing customers highlighting the value and ROI of using Decawork.
