--	------------------------------	---------------------------------	-----------

INVESTMENT THESIS

Executor aims to be the open-source integration management layer for AI, enabling seamless connections between various services and AI agents [1][2].

TEAM	PRODUCT
Reported team size: 1 [1].	Executor is an integration platform that connects AI agents to various services through a unified management layer. It offers both self-hosted and cloud-hosted options with a free tier [2][3].
MARKET	WHY NOW
The market for integration platforms in the AI space is growing, but specific ICP clarity and route to customers are not disclosed [2].	The increasing complexity and need for seamless integration between AI agents and various services create a timely opportunity for Executor [1].

DIMENSION SCORE BREAKDOWN

Workflow Pain 7/10 / 25% wt	Speed To Value 6/10 / 20% wt	Compounding Advantage 5/10 / 20% wt	Team Execution 3/10 / 15% wt	Market Distribution 4/10 / 20% wt
--------------------------------	---------------------------------	--	---------------------------------	--------------------------------------

KEY RISKS	WHAT CHANGES OUR MIND
- The small team size may limit execution capacity [1].	- Evidence of significant customer adoption and traction. - Detailed financials and revenue projections.
