## INVESTMENT THESIS

Hebbian Robotics develops open-source SDKs for quality control pipelines in Physical AI, aiming to streamline data workflows for robotics teams [1].

### TEAM

The team comprises two members with backgrounds from top embodied AI and ECE programs at Columbia University and the National University of Singapore. They have experience in building infrastructure at Jane Street and Verkada, and have topped Stanford's LLM benchmarks [2].

### PRODUCT

HFlow is an open-source SDK that provides quality control pipelines for Physical AI data. It allows teams to scale their data pipelines efficiently without managing infrastructure, offering durable execution, observability, and auditability [2].

### MARKET

The market for robotics data infrastructure is growing, with teams increasingly collecting large volumes of egocentric video data. Hebbian Robotics targets data teams within this market, offering an open-source solution that can be integrated with existing systems like GitHub [2].

### WHY NOW

The increasing demand for high-quality data in robotics and the rising costs associated with data collection and curation make Hebbian Robotics' solution timely. The company's open-source approach also allows for community-driven improvements and broader adoption [2].

## DIMENSION SCORE BREAKDOWN

**Workflow Pain**  
8/10 / 25% wt

**Speed To Value**  
7/10 / 20% wt

**Compounding Advantage**  
6/10 / 20% wt

**Team Execution**  
5/10 / 15% wt

**Market Distribution**  
6/10 / 20% wt

### KEY RISKS

- The small team size may limit the company's ability to scale quickly [1].

### WHAT CHANGES OUR MIND

- Evidence of significant adoption by major robotics labs or companies.  
- Demonstrated revenue growth or clear monetization strategy.
