INVESTMENT THESIS

Hemlock aims to revolutionize robotic AI training by providing force-sensing data through a wristband, addressing the critical gap in force data that current video and pose-based methods cannot capture [1].

TEAM

Reported team size: 1. YC marks the company as hiring [1].

PRODUCT

The Bracelet, a wrist-worn surface EMG band that reads electrical activity of forearm muscles to recover contraction force directly [1].

MARKET

Targeting robotics labs and industries requiring precise robotic manipulation, such as assembly lines and warehouses [1].

WHY NOW

The convergence on egocentric video and hand pose for robotic AI training, coupled with the recognized gap in force data, creates a timely opportunity for Hemlock's technology [1].

DIMENSION SCORE BREAKDOWN

Workflow Pain
8/10 / 25% wt

Speed To Value
6/10 / 20% wt

Compounding Advantage
7/10 / 20% wt

Team Execution
4/10 / 15% wt

Market Distribution
6/10 / 20% wt

KEY RISKS

- The technology's effectiveness in real-world applications and its adoption by robotics labs [1].

WHAT CHANGES OUR MIND

- Evidence of successful integration and performance improvement in robotic AI trained with Hemlock's data.
- Testimonials or case studies from early adopters highlighting the technology's impact.

TOP SOURCES

#	TRUST	SOURCE	SUPPORTING EVIDENCE
[1]	VERIFIED	YC profile: Hemlock	Official Registry: Force-sensing wristband for training robotic AI Every serious robotics lab is bottlenecked on the same thing: demonstration data.
[2]	CLAIMED	Hemlock — Muscle Memory For Machines	Company Website: [PRICING & TIERS]: Stream it live or hand it off in the formats your team already trains on. No new tooling to adopt.
