INVESTMENT THESIS

Marker aims to replace frequent, expensive SMB workflows with AI agents, leveraging its deep understanding of client operations to deliver rapid, embedded transformations [1].

TEAM The team comprises 3 members, with prior experience at Gap's Office of AI, suggesting relevant domain expertise [1].	PRODUCT Marker's product involves embedding within companies to deploy custom AI agents that automate workflows, reducing manual work and speeding up processes like onboarding and QA [1].
MARKET Targets SMBs and larger enterprises with complex workflows that could benefit from automation. Evidence of traction with a Fortune 500 retailer and an 8-figure prop-tech company [1].	WHY NOW The increasing complexity and cost of manual workflows in businesses, coupled with the rising adoption of AI technologies, create a timely opportunity for Marker's solution [1].

DIMENSION SCORE BREAKDOWN				
Workflow Pain 8/10 / 25% wt	Speed To Value 7/10 / 20% wt	Compounding Advantage 6/10 / 20% wt	Team Execution 5/10 / 15% wt	Market Distribution 7/10 / 20% wt

KEY RISKS - Dependency on client adoption and the effectiveness of AI agents in diverse operational contexts [1].	WHAT CHANGES OUR MIND - Evidence of significant revenue growth or expansion into new market segments. - Demonstrated success in automating complex workflows beyond onboarding and QA.
