## INVESTMENT THESIS

OpenVector aims to replace labor-intensive workflows in SMBs with AI-powered camera automation, potentially reducing costs and improving efficiency [1].

### TEAM

The team comprises founders with backgrounds in AI and embedded systems, including a Harvard PhD dropout and a CMU alum with experience at Tata [3].

### PRODUCT

The product uses AI to monitor camera feeds and automate actions based on detected events, integrating with existing systems to enhance operational workflows [1].

### MARKET

The market includes SMBs across industries like manufacturing, retail, and services, though specific market size and distribution strategy are not disclosed [1].

### WHY NOW

The ubiquity of cameras and advancements in AI make this technology timely and relevant for automating physical workflows [1].

## DIMENSION SCORE BREAKDOWN

Workflow Pain  
8/10 / 25% wt

Speed To Value  
7/10 / 20% wt

Compounding Advantage  
6/10 / 20% wt

Team Execution  
7/10 / 15% wt

Market Distribution  
5/10 / 20% wt

### KEY RISKS

- The reliance on camera integration and existing systems could pose technical challenges and limit adoption [1].

### WHAT CHANGES OUR MIND

- Evidence of significant customer traction or partnerships would significantly bolster confidence in the product's market fit [1].  
- Demonstrated scalability and integration success with major industry players would indicate strong market potential [1].
