INVESTMENT THESIS

Shiraz AI aims to disrupt traditional manufacturing automation by deploying robots that can learn new tasks from a single human demonstration, targeting high-mix manufacturing environments [1].

TEAM

The team comprises experienced founders with backgrounds in robotics at Boston Dynamics and Amazon Robotics [1].

PRODUCT

The product is a robot foundation model that learns new manufacturing tasks from a single human demonstration, offering a full stack solution including hardware, model, and on-site deployment [1].

MARKET

The market is described as high-mix manufacturing, but specific ICP clarity, market size, and distribution motion are not disclosed [1].

WHY NOW

The timing is driven by the increasing difficulty in hiring enough people and the rigidity and expense of traditional automation in high-mix manufacturing [1].

DIMENSION SCORE BREAKDOWN

Workflow Pain
8/10 / 25% wt

Speed To Value
6/10 / 20% wt

Compounding Advantage
5/10 / 20% wt

Team Execution
7/10 / 15% wt

Market Distribution
4/10 / 20% wt

KEY RISKS

- The risk of the technology not being able to adapt quickly enough to changing manufacturing lines [1].

WHAT CHANGES OUR MIND

- Evidence of significant customer adoption and revenue growth.
- Detailed market size and competitive landscape.
