INVESTMENT THESIS

SpaceFlow Technologies, Inc. aims to replace frequent, expensive SMB supply chain workflows with AI agents that integrate with existing ERPs and tools, providing a governed context layer and reusable skills for operations [1].

TEAM

Team size is reported to be 4 members, but detailed execution evidence is not disclosed [1].

PRODUCT

The product is a managed runtime for AI agents that automate supply chain workflows, integrating with ERPs, email, spreadsheets, documents, and supplier portals. It offers features like normalizing quotations, chasing suppliers, reconciling inventory, and aligning demand and supply [1].

MARKET

The market is B2B, specifically targeting supply chain and logistics. The ICP is industrial and regulated enterprises looking to automate high-stakes operations without replacing existing systems [1].

WHY NOW

The timing is driven by the increasing need for automation in supply chain operations and the growing adoption of AI in enterprise workflows [1].

DIMENSION SCORE BREAKDOWN

Workflow Pain
8/10 / 25% wt

Speed To Value
6/10 / 20% wt

Compounding Advantage
5/10 / 20% wt

Team Execution
4/10 / 15% wt

Market Distribution
6/10 / 20% wt

KEY RISKS

- Security risks associated with AI agent access to sensitive enterprise data [2].

WHAT CHANGES OUR MIND

- Evidence of significant customer adoption and revenue growth.
- Detailed security audit results and customer testimonials.
