INVESTMENT THESIS

Traceforce aims to provide AI security and control for devices, addressing the growing security risks associated with AI applications [1]. The company's advantage lies in its ability to offer on-device security solutions that integrate with existing IT tools and provide automated remediation [2].

TEAM The team size is reported to be 2, and the company is marked as hiring by YC [1].	PRODUCT Traceforce provides an AI security and control platform that runs on devices to secure browser AI, desktop apps, and CLI agents. The platform offers features such as 15-minute self-serve onboarding, tracking of tool calls from MCPs to CLIs, and automated remediation of AI packages on-device [2].
MARKET The company targets security teams at companies ranging from startups to Fortune 500s. The platform integrates with popular MDM solutions such as Jamf, JumpCloud, NinjaOne, and Iru [2].	WHY NOW The increasing use of AI applications like ChatGPT and Claude has introduced new security risks that traditional security tools are not equipped to handle. Traceforce addresses this gap by providing on-device security solutions specifically designed for AI applications [1].

DIMENSION SCORE BREAKDOWN				
Workflow Pain 8/10 / 25% wt	Speed To Value 7/10 / 20% wt	Compounding Advantage 6/10 / 20% wt	Team Execution 5/10 / 15% wt	Market Distribution 7/10 / 20% wt
KEY RISKS - The small team size may limit the company's ability to scale quickly [1].		WHAT CHANGES OUR MIND - Evidence of significant customer traction or partnerships with major MDM providers. - Detailed case studies or testimonials from high-profile customers.
