--	------------------------------	---	-----------

INVESTMENT THESIS Waybill aims to streamline and automate the procurement and inventory management process for hardware teams, addressing a complex and time-consuming workflow [1].
--

TEAM The team is reported to have prior experience in the supply chain industry, having worked at LAT Aerospace and WarelQ. The team size is reported to be 5, and the company is hiring [1].	PRODUCT Waybill automates the procurement process for hardware parts, handling sourcing, negotiation, freight, customs, delivery, and inventory management. It integrates with communication tools like Slack and Gmail for seamless order initiation [1][2].
MARKET The target market is hardware teams that require efficient procurement and inventory management. The market size and distribution motion are not disclosed [1].	WHY NOW The complexity and inefficiency of the current procurement process for hardware parts present a significant opportunity for automation and optimization [1].

DIMENSION SCORE BREAKDOWN				
Workflow Pain 8/10 / 25% wt	Speed To Value 7/10 / 20% wt	Compounding Advantage 6/10 / 20% wt	Team Execution 5/10 / 15% wt	Market Distribution 4/10 / 20% wt

KEY RISKS - The risk of not achieving sufficient adoption among hardware teams, which would undermine the value proposition [1].	WHAT CHANGES OUR MIND - Evidence of significant customer traction and positive feedback. - Demonstration of a clear competitive advantage or moat in the market.
