--	------------------------------	-------------------------------	-----------

INVESTMENT THESIS

Marker aims to replace frequent, expensive SMB workflows with AI agents, embedding within companies to understand and automate operations, with a focus on quick deployment and compounding advantages through custom AI solutions [1][2].

TEAM The team consists of three members, with prior experience embedding AI within a Fortune 500 retailer [1].	PRODUCT Marker's product is a platform for creating and deploying custom AI agents that integrate with existing company systems to automate workflows [1][2].
MARKET The market is B2B, targeting SMBs with frequent, expensive workflows that can be automated. The distribution motion involves direct embedding within companies [1][2].	WHY NOW The increasing availability and sophistication of AI technologies make it an opportune time for Marker to offer embedded AI solutions that can quickly deliver value to SMBs [1][2].

DIMENSION SCORE BREAKDOWN				
Workflow Pain 8/10 / 25% wt	Speed To Value 7/10 / 20% wt	Compounding Advantage 6/10 / 20% wt	Team Execution 5/10 / 15% wt	Market Distribution 7/10 / 20% wt

KEY RISKS - The small team size may limit scalability and execution speed [1].	WHAT CHANGES OUR MIND - Evidence of significant revenue growth or a large-scale client win. - Detailed case studies or testimonials from current clients.
