INVESTMENT THESIS

Covera aims to replace frequent, costly workflows for insurance brokers by providing AI agents that handle tasks like submission intake, carrier quoting, and claims handling, allowing brokers to focus on client advising and selling [1].

TEAM	PRODUCT
Team size is reported as 2, and the company is marked as hiring by YC [1].	The product is an AI-native OS with ready-to-use agents for various insurance broker tasks, integrating with existing tools like Applied Epic, AMS360, EZLynx, HawkSoft, Salesforce, and HubSpot [1].
MARKET	WHY NOW
The market is the insurance broker segment, with a focus on agencies of all sizes. The distribution motion is through direct integration with tools commonly used by brokers [1].	The increasing complexity and volume of insurance broker workflows, coupled with the rising cost of data entry and administrative tasks, make now an opportune time for automation solutions like Covera [1].

DIMENSION SCORE BREAKDOWN

Workflow Pain 8/10 / 25% wt	Speed To Value 7/10 / 20% wt	Compounding Advantage 6/10 / 20% wt	Team Execution 4/10 / 15% wt	Market Distribution 7/10 / 20% wt
---------------------------------------	--	---	--	---

KEY RISKS	WHAT CHANGES OUR MIND
- The small team size and early stage of the company pose execution risks [1].	- Evidence of significant traction with large insurance agencies. - Demonstrated ROI for brokers using Covera's services.
