--	----------------------------	--------------------------------	-----------

INVESTMENT THESIS

Covera aims to replace frequent, expensive workflows for insurance brokers with AI agents, potentially increasing efficiency and allowing brokers to focus more on client advising and selling [1].

TEAM Team size is reported to be 2, with the company marked as hiring by Y Combinator [1].	PRODUCT The product is an AI-native OS for insurance brokers, offering AI agents to automate tasks like submission intake, carrier quoting, quote comparison, claims handling, and collections [1].
MARKET The market is the insurance brokerage sector, with Covera targeting agencies of all sizes. The company claims integration with popular agency management systems and CRMs [1].	WHY NOW The increasing complexity and volume of insurance-related tasks may drive demand for automation solutions like Covera's AI agents [1].

DIMENSION SCORE BREAKDOWN				
Workflow Pain 8/10 / 25% wt	Speed To Value 7/10 / 20% wt	Compounding Advantage 6/10 / 20% wt	Team Execution 4/10 / 15% wt	Market Distribution 7/10 / 20% wt

KEY RISKS - The small team size may pose execution risks [1].	WHAT CHANGES OUR MIND - Evidence of significant customer acquisition or partnership with a major insurance brokerage would be compelling. - Demonstrable impact on broker efficiency and client satisfaction metrics.
