INVESTMENT THESIS

Gini is an AI coworker designed to automate tasks and workflows within team collaboration platforms like Slack and Teams, aiming to reduce manual work and keep company knowledge bases updated [1].

TEAM The team consists of three cofounders with relevant experience in software development and AI, previously working at companies like Tesla, Intel, Flatiron Health, and HPE [2].	PRODUCT Gini is an AI assistant that integrates with Slack and Teams, designed to perform tasks and maintain company documentation. It operates on a credit-based pricing model, with security features including encryption and isolated...
MARKET The market consists of SMBs looking to automate workflows and reduce manual task loads within their collaboration tools. Gini targets teams that use Slack or Teams for communication [1][6].	WHY NOW The increasing reliance on collaboration tools like Slack and Teams, coupled with the growing demand for automation in workflow management, positions Gini well to address current market needs [1][6].

DIMENSION SCORE BREAKDOWN				
Workflow Pain 8/10 / 25% wt	Speed To Value 7/10 / 20% wt	Compounding Advantage 6/10 / 20% wt	Team Execution 7/10 / 15% wt	Market Distribution 6/10 / 20% wt

KEY RISKS - The scalability of Gini's AI model and its ability to handle complex tasks without human intervention [1].	WHAT CHANGES OUR MIND - Evidence of significant customer adoption and retention rates. - Demonstration of Gini's ability to handle increasingly complex tasks without errors.
